1. Introduction

A Standard RFC is a change that is recurrent, well known, and has been proven to follow a pre-defined, relatively risk-free implementation. These requests must be submitted to the CAB(s) to be approved as a Standard RFC. Voting and deadlines for the Standard RFC fall under the framework of a Normal RFC. Changes in an approved Standard RFC no longer require the CAB(s) approval on a case-by-case basis.

This document provides a reference for the CAB and Submitters to view all RFC's that have been approved to become Standard. This document and all CM documents can be found on the [CM website](#).
