## Introduction

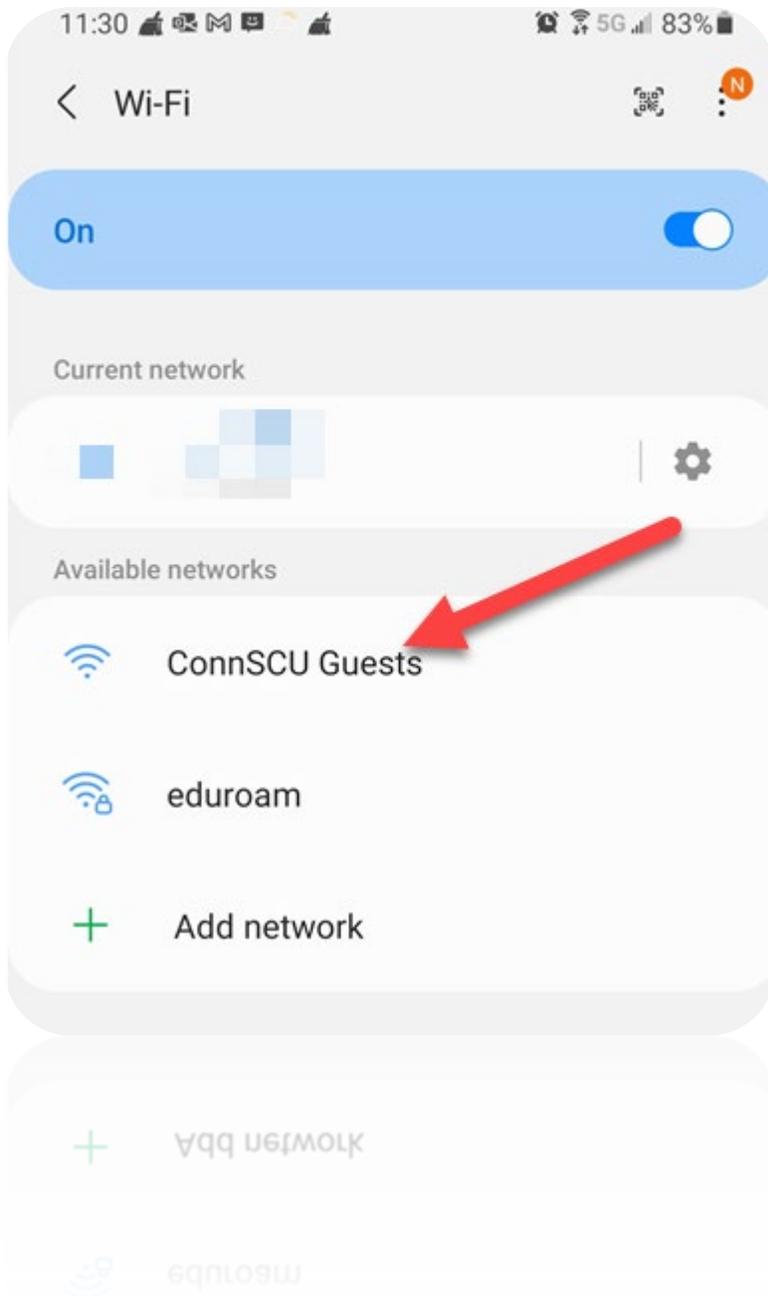

This is an encrypted network for students, faculty, and staff. It is the recommended network for anyone with a ConnSCU NetID. You will need a wireless device which supports WPA2 in order to connect to the network and you will have to configure a wireless connection before you can connect. Once configured, clients will be able to reconnect automatically, rather than re-entering your credentials every instance.

### 1. Finding ConnSCU on Android

**Step 1** – Open up ‘Settings’ and select ‘Connections’:

**Step 2** – From the available networks, select ‘ConnSCU Guest’:

## 2. Configuring Your Connection to ConnSCU

**Step 1** – You should then be prompted for your guest ID and password in a browser window; if you are not redirected to this portal, please type 1.1.1.1 into the URL of a browser, any browser:

**CSCU Guest Portal**

Note: This service is **not** intended for faculty, staff, students and others who have a NetID. Any user with a NetID needs to use **ConnSCU** wireless.
