Introduction

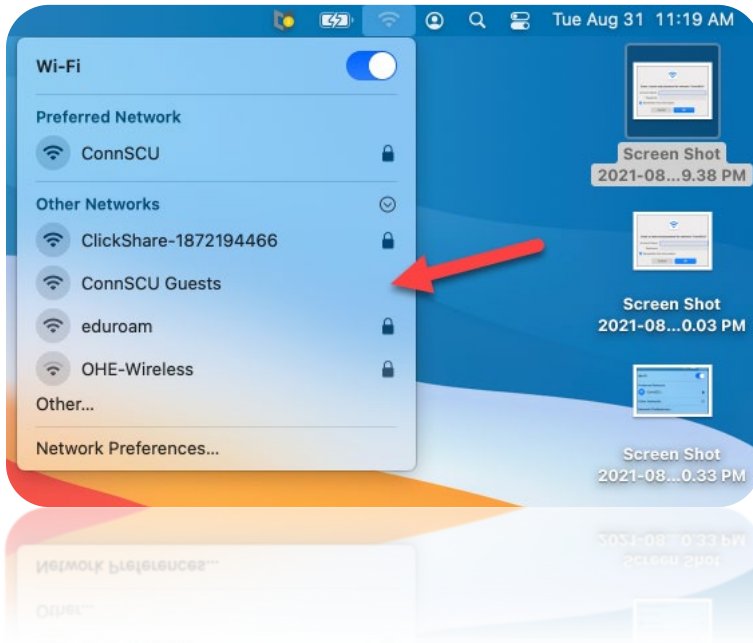

This is an encrypted network for students, faculty, and staff. It is the recommended network for anyone with a ConnSCU NetID. You will need a wireless device which supports WPA2 in order to connect to the network and you will have to configure a wireless connection before you can connect. Once configured, clients will be able to reconnect automatically, rather than re-entering your credentials every instance.

1. Finding ConnSCU Guest on MacOS

Step 1 – Open up your Wi-Fi settings in the top-right hand corner:

Step 2 – From the available networks, select ‘ConnSCU Guest’:

2. Configuring Your Connection to ConnSCU Guest

Step 1 – You should then be prompted for your guest ID and password in a browser window; if you are not redirected to this portal, please type 1.1.1.1 into your browser, in any browser:

CSCU Connecticut State Colleges & Universities

CSCU Guest Portal

*Note: This service is **not** intended for faculty, staff, students and others who have a NetID. Anyone with a NetID needs to use **ConnSCU** wireless.*
