### 1. Introduction

The ConnSCU Guests network offers short-term access for sponsored guests who have need for wireless connectivity while on campus, such as visiting parents, guest lecturers, vendors, and others. You will need to request a temporary account to use this network from your [local IT department](#).

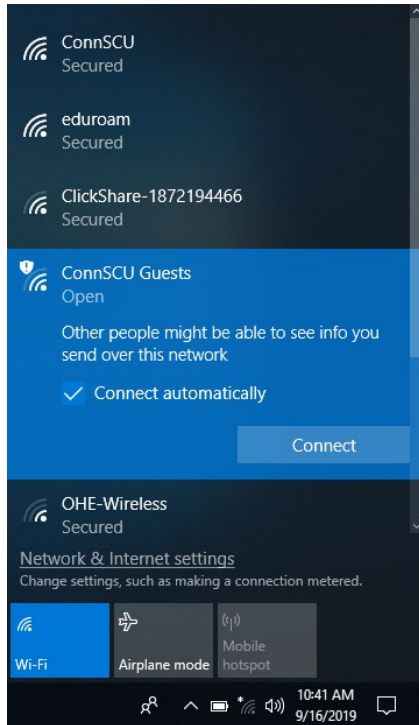

You will need a wireless device which supports WPA2 in order to connect to this network, and you will have to configure a wireless connection (see details below for platform specific information) before you can connect.

### 2. Connecting to the ConnSCU Guests Wireless Network

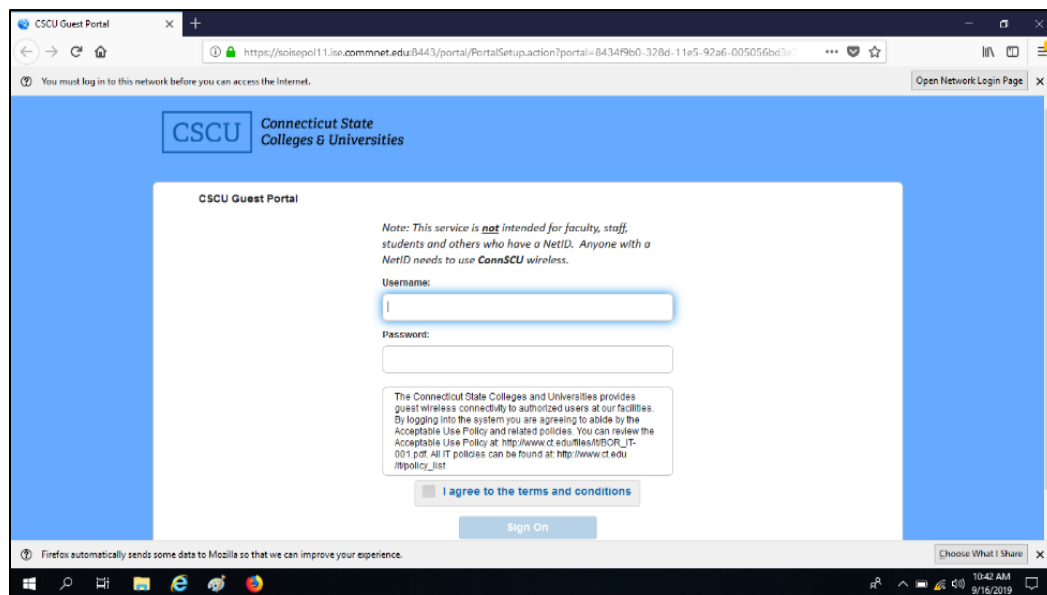

**Step 1** - View available wireless networks via configured wireless utility (in this case, utilizing Windows' native wireless utility) – click on the wireless icon in system tray:

**Step 2** - Click on 'ConnSCU Guests' in the list, click "Connect Automatically", then choose 'Connect'

**Step 3** – If you are not redirected automatically, open a browser (Chrome or Firefox are recommended) and you will be redirected to the ConnSCU Guests portal:

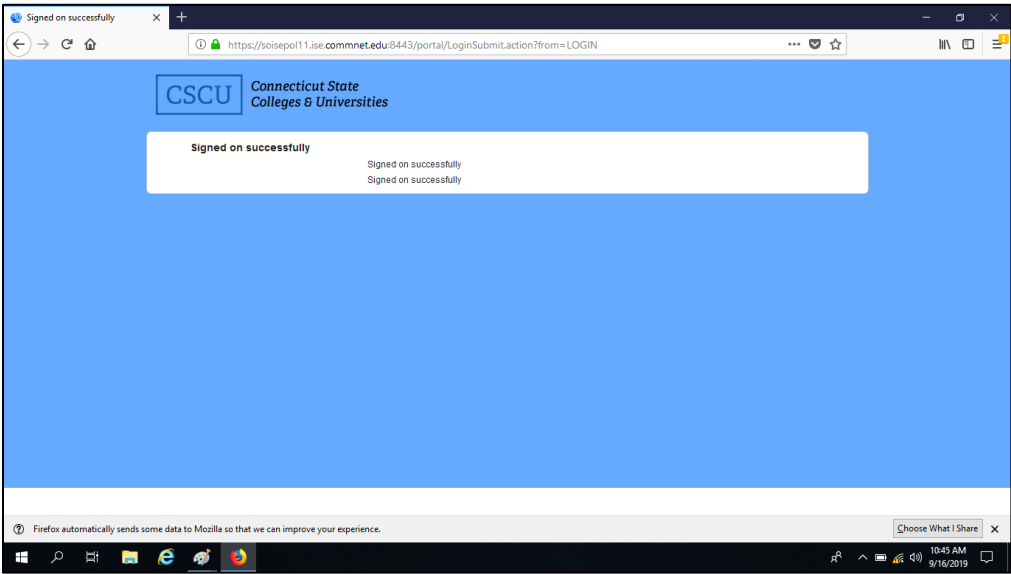

Login with the username and password provided when you requested access. If you agree to the terms and conditions, check "I agree to the terms and conditions", then click "Sign On".

The Connecticut State Colleges and Universities provides guest wireless connectivity to authorized users at our facilities. By logging into the system you are agreeing to abide by the Acceptable Use Policy and related policies. You can review the Acceptable Use Policy at: [http://www.ct.edu/files/it/BOR\\_IT-001.pdf](http://www.ct.edu/files/it/BOR_IT-001.pdf). All IT policies can be found at: [http://www.ct.edu/it/policy\\_list](http://www.ct.edu/it/policy_list)

I agree to the terms and conditions

Sign On

**Step 5** – The screen below should appear to confirm the connection after accepting the user policy agreement. Commence browsing!

**Finished!**

### 3. Contacting Support

If you have any issues or questions, please contact your [local IT department](#).
