1. Introduction

The ConnSCU Guests network offers short-term access for sponsored guests who have need for wireless connectivity while on campus, such as visiting parents, guest lecturers, vendors, and others. You will need to request a temporary account to use this network from your [local IT department](#).

You will need a wireless device which supports WPA2 in order to connect to this network, and you will have to configure a wireless connection (see details below for platform specific information) before you can connect.

2. Connecting to the ConnSCU Guests Wireless Network

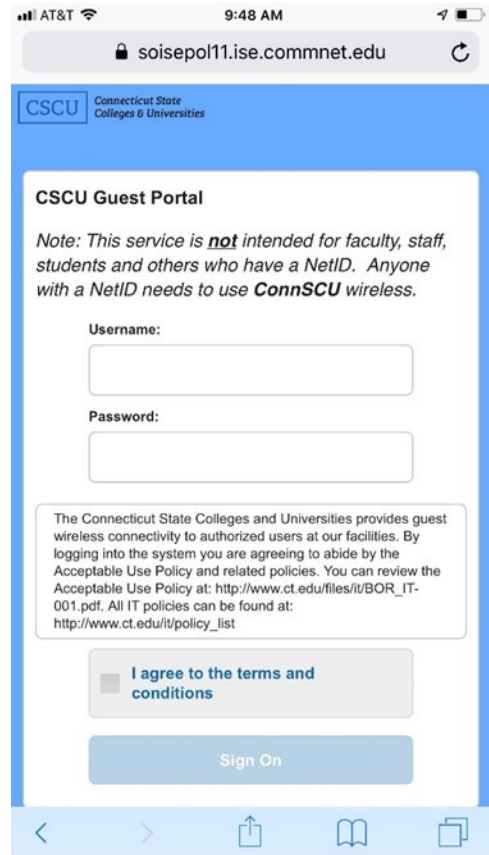

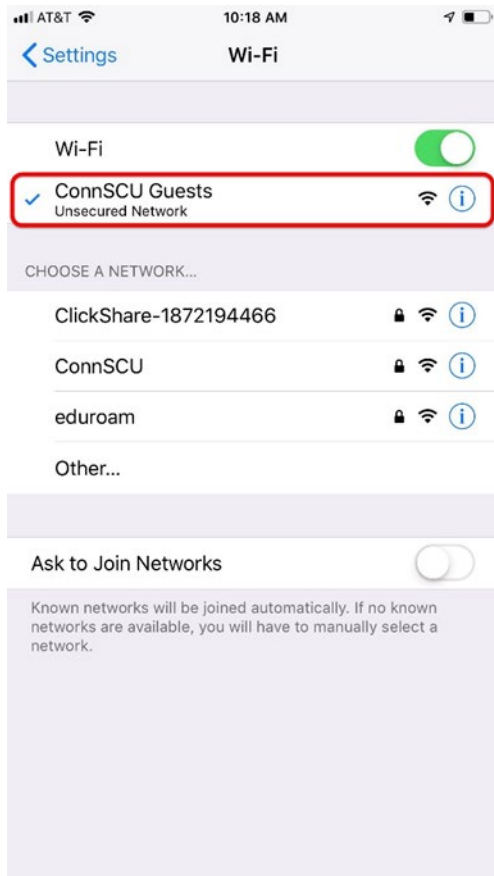

Step 1 - Access 'Settings' from your iPad/iPhone and select 'Wi-Fi' as shown below:

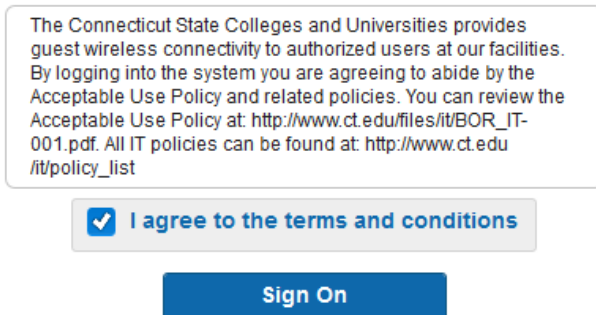

Step 2 - Ensure the 'Wi-Fi' slider is set to 'On' as shown, and select 'ConnSCU Guests':

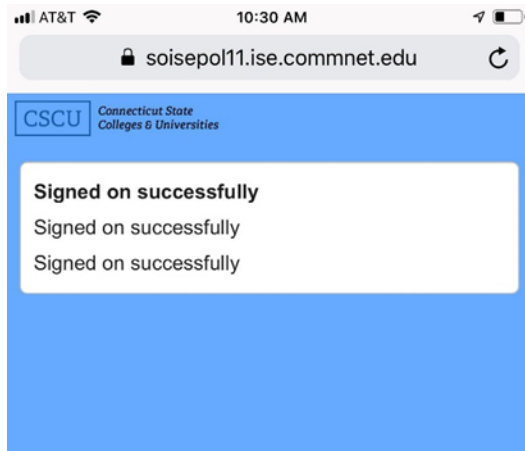

Step 3 – After selecting the 'ConnSCU Guests' network, you will notice a checkmark next to the network. If you are not automatically redirected to the Guest Portal Page, then open up a browser (Chrome or Safari are recommended) and navigate to "1.1.1.1":

Log in with the username and password provided when you requested access. If you agree to the terms and conditions, check **“I agree to the terms and conditions”**, then click **“Sign On”**.

Step 5 – The screen below should appear to confirm the connection after accepting the user policy agreement. You now have Internet access!

Finished!

3. Contacting Support

If you have any issues or questions, please contact your [local IT department](#).
