1. Introduction

This is an encrypted network for students, faculty and staff. It is the recommended wireless network for anyone with a ConnSCU NetID.

You will need a wireless device which supports WPA2 in order to connect to this network, and you will have to configure a wireless connection (see details below for platform specific information) before you can connect. Once configured, most clients will be able to reconnect automatically rather than having to re-enter your credentials.

2. Connecting to the ConnSCU Wireless Network

Step 1 - Access ‘Settings’ from your Android and select ‘Connections’ as shown below:
**Step 2** - Select ‘Wi-Fi’:

![Wi-Fi Settings](image1)

**Step 3** - Ensure the ‘Wi-Fi’ slider is set to ‘On’ as shown, then select ‘ConnSCU’:

![Wi-Fi Connections](image2)

**Step 4** – After selecting ‘ConnSCU’, perform the following:

1. For ‘EAP Method’, select ‘PEAP’,
2. For ‘CA Certificate’, select ‘Don’t Validate’,
3. For ‘Identity’, enter your **FULL NETID**.
4. For ‘Password’, enter your **mycommNet password**.
5. Tap ‘Connect’.
Step 5 – You should then see “Connected” underneath “ConnSCU” if you’ve connected successfully. Happy browsing!
3. Contacting Support

If you have any issues or questions, please contact your [local IT department].
