Introduction

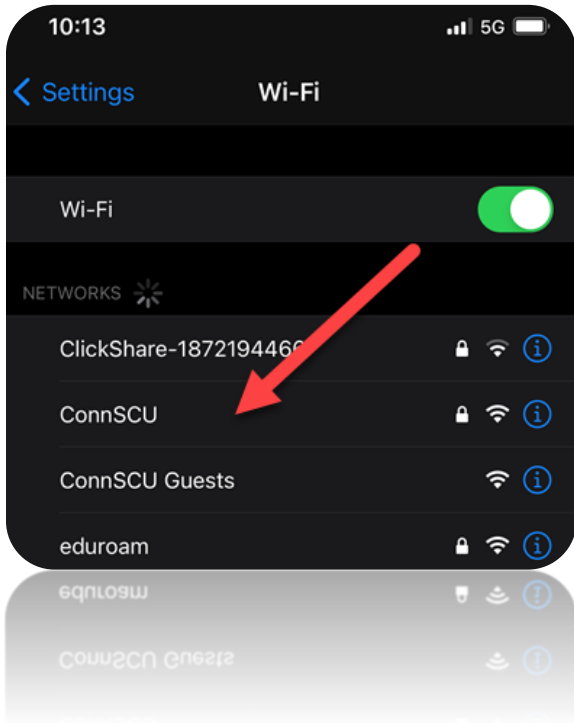

This is an encrypted network for students, faculty, and staff. It is the recommended network for anyone with a ConnSCU NetID. You will need a wireless device which supports WPA2 in order to connect to the network and you will have to configure a wireless connection before you can connect. Once configured, clients will be able to reconnect automatically, rather than re-entering your credentials every instance.

1. Finding ConnSCU on iOS

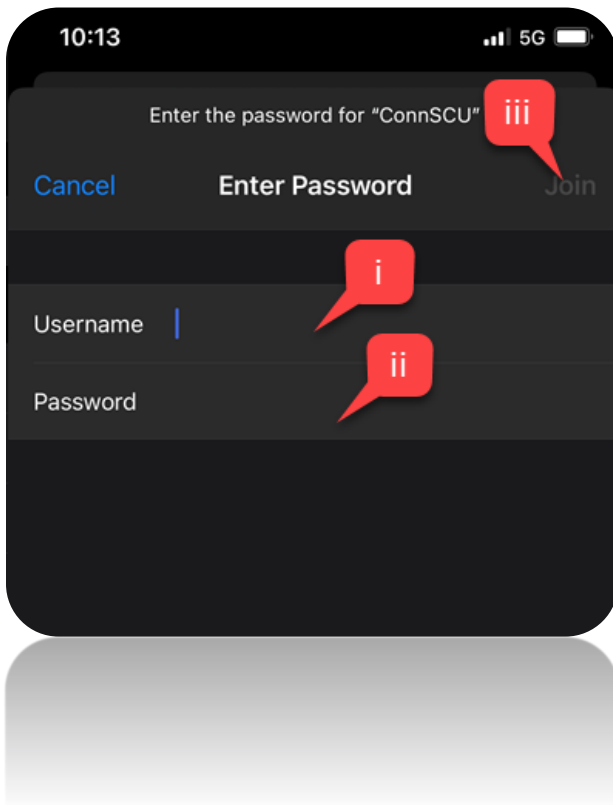

Step 1 – Open up ‘Settings’ and select ‘Wi-Fi’:

Step 2 – From the available networks, select ‘ConnSCU’:

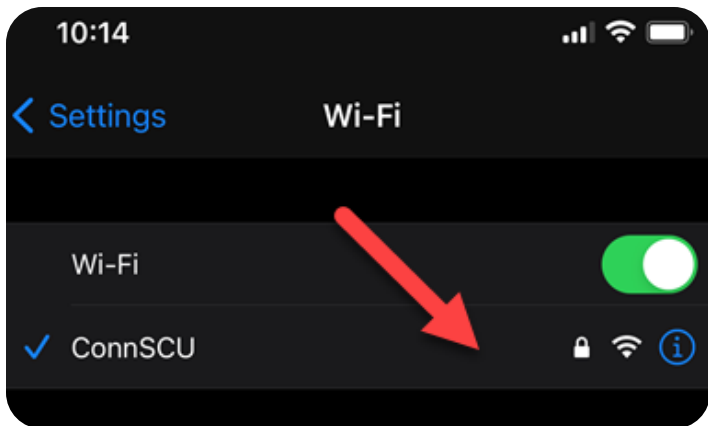

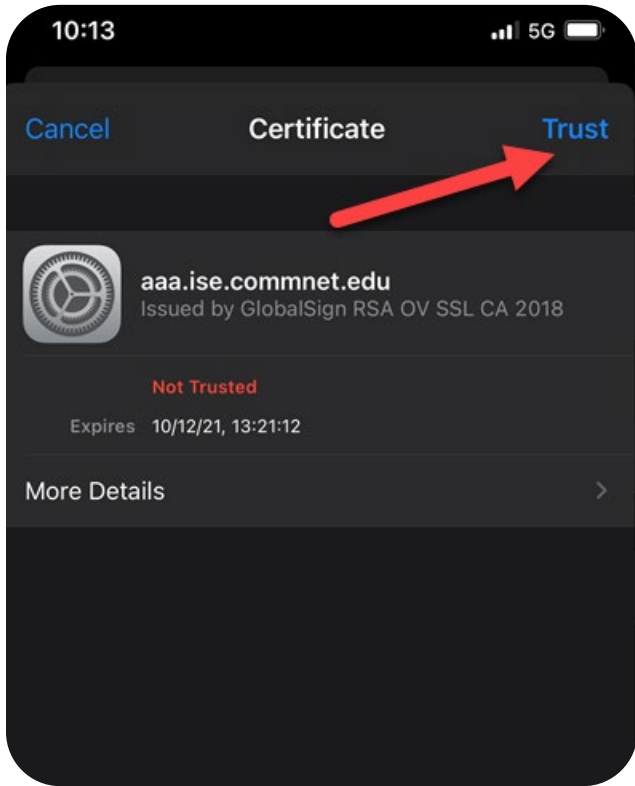

2. Configuring Your Connection to ConnSCU

Step 1 – You should be prompted for your NetID and password:

- i. Enter your full NetID
(ex. 01234567@student.comnet.edu)
- ii. Enter your password (the password used to log into myCommNet)
- iii. When the correct information has been filled out, press ‘Join’

Step 2 – You will now be asked to ‘trust’ the domain; select ‘Trust’:

All set!

You will now be connected to the network ConnSCU.

Contacting Support
