1. **Introduction**

This is an encrypted network for students, faculty and staff. It is the recommended wireless network for anyone with a ConnSCU NetID.

You will need a wireless device which supports WPA2 in order to connect to this network, and you will have to configure a wireless connection (see details below for platform specific information) before you can connect. Once configured, most clients will be able to reconnect automatically rather than having to re-enter your credentials.

2. **Connecting to the ConnSCU Wireless Network**

   **Step 1** - Access ‘Settings’ from your iPad/iPhone and select ‘Wi-Fi’ as shown below:
Step 2 - Ensure the ‘Wi-Fi’ slider is set to ‘On’ as shown, then select ‘ConnSCU’:

Step 3 – After selecting the ‘ConnSCU’ network, you will be prompted for a Username and Password. Enter your complete student/faculty NetID and Password.

Step 4 – During the authentication process, you may see a ‘Certificate’ screen appear. If you do, tap ‘Trust’ in the top right.
Step 5 – You should then see a blue checkmark next to the ConnSCU network. If you do, you are connected! Happy browsing!

Finished!

3. Contacting Support

If you have any issues or questions, please contact your local IT department.
