Wireless

Accessing the eduroam Wireless Network from iPad/iPhone

(Revision Date: 6/17/2019)

Introduction

eduroam (education roaming) is a secure, worldwide roaming wireless access service developed for, and used by, the international research and education community.

You will need a wireless device which supports WPA2 in order to connect to this network, and you will have to configure a wireless connection (see details below for platform specific information) before you can connect. Once configured, most clients will be able to reconnect automatically rather than having to re-enter your credentials.

Connecting to the eduroam Wireless Network

Step 1 – Access ‘Settings’  on your iPad/iPhone and select ‘Wi-Fi’ as shown below:

Step 2 – Ensure the ‘Wi-Fi’ slider is set to ‘On’. Select “eduroam” from the list of available wireless networks.

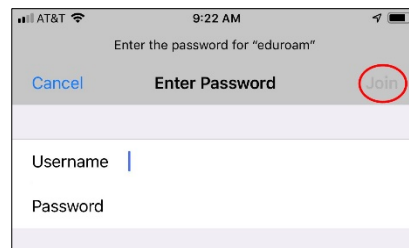

Step 3 – You will be prompted to enter your login credentials. Insert your information, then click ‘Join’:

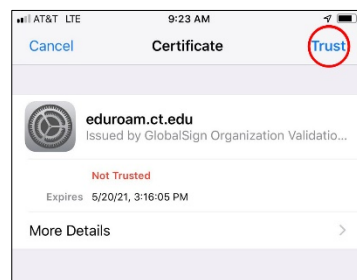

- For Community College and BOR System Office users, login with your [NetID](#) and password. Example:

Username: 01234567@commnet.edu

Password: Your password

Step 4 – If prompted, tap ‘Trust’ to accept the certificate

Finished!

When you return to a CSCU-affiliated location, it is recommended that you reconnect to the ConnSCU SSID.
