Introduction

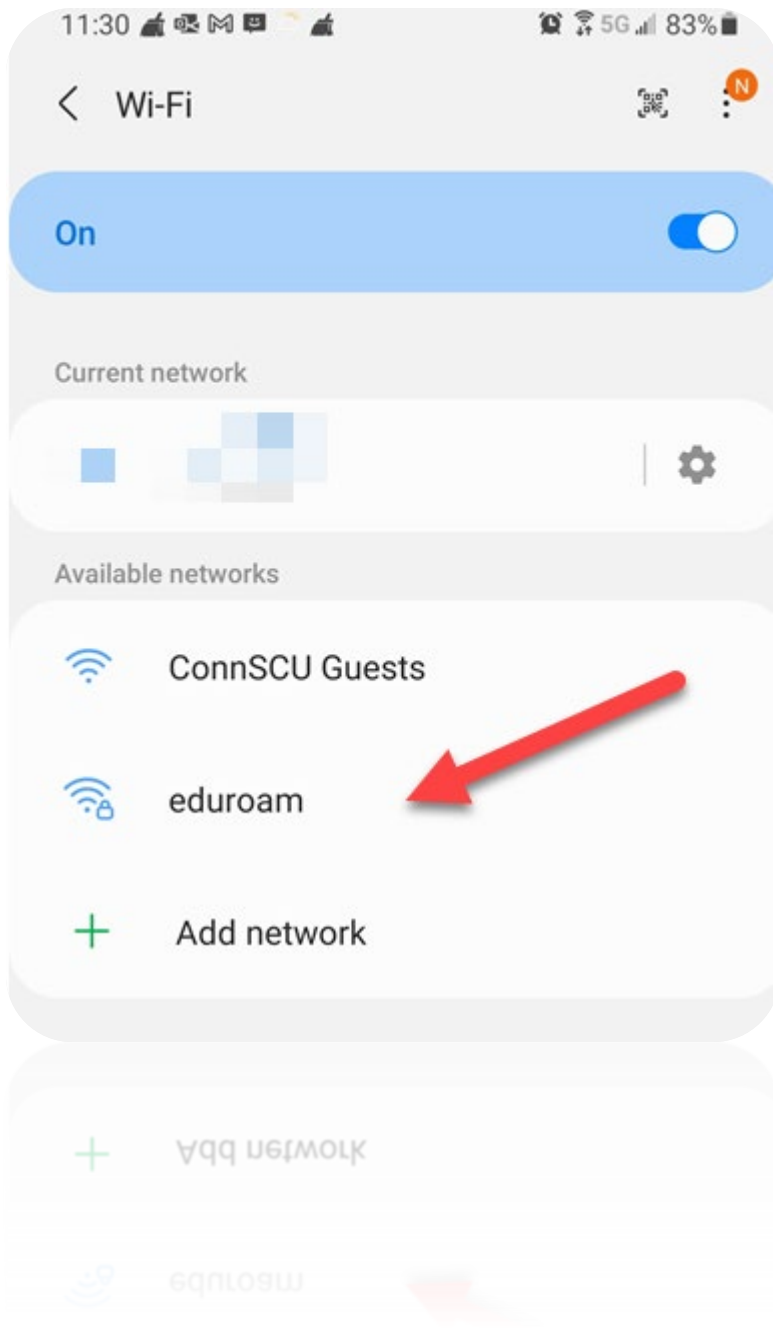

This is an encrypted network for students, faculty, and staff. It is the recommended network for anyone with a ConnSCU NetID. You will need a wireless device which supports WPA2 in order to connect to the network and you will have to configure a wireless connection before you can connect. Once configured, clients will be able to reconnect automatically, rather than re-entering your credentials every instance.

1. Finding eduroam on Android

Step 1 – Open up ‘Settings’ and select ‘Connections’:

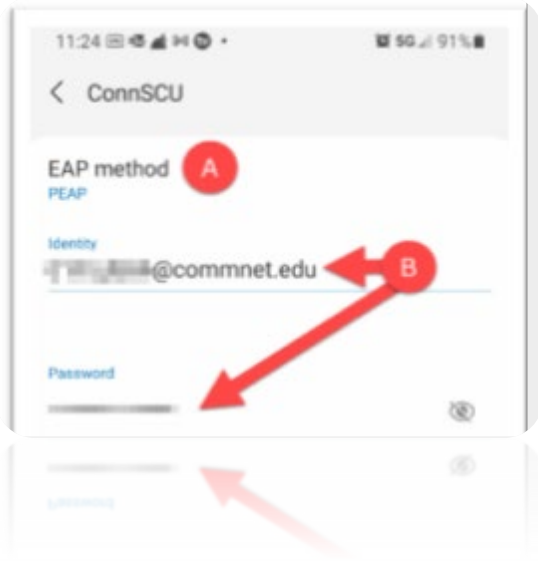

Step 2 – From the available networks, select 'eduroam':

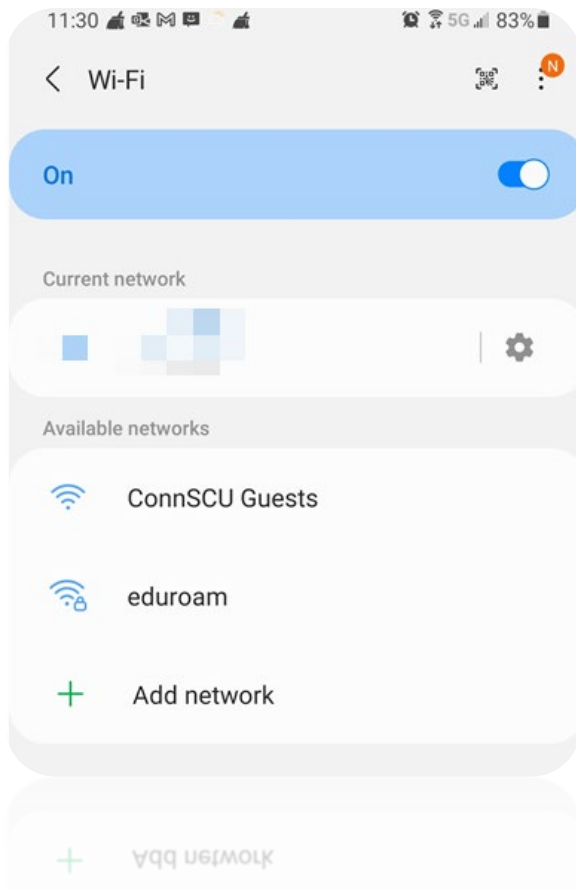

2. Configuring Your Connection to eduroam

Step 1 – Log in with your full NetID (ex. 01234567@student.comnet.edu) and your password (the password used to log into myCommNet):

Now you're connected to the eduroam network!

Contacting Support

If you have any issues or questions, please contact your [local IT department](#).
